

## About Enex TestLab

“The world’s premier independent testing laboratory.”

Since 1989 Enex TestLab has helped the world’s biggest companies minimise risk, improve products and save money.

Enex TestLab provides high quality independent testing services and advice.

Our range of testing include:

- Software <
- Hardware <
- Systems <
- Security <
- Usability & Accessibility <
- Gaming, Wagering, <
- Lotteries & Casinos <
- Media & Communications <
- Physical & Materials <

Test assured, rest assured.

# Software Testing

Software Testing is a key division of Enex TestLab. Enex TestLab has been a critical component in software testing projects globally since 1989.

If you are developing or deploying software, Enex TestLab can provide customised, scientific and impartial software testing services and advice that:

- > Lowers your risk
- > Maximises the return on your investment

Enex TestLab’s track record demonstrates that we can save you money, improve your product, and reduce your risk. Our software testing delivers assurance and value in many different ways. Ask us how.

***Test with Enex TestLab, not your customers!***

## Services

### Test Management

Organisation, coordination and management of the entire test process, from planning to reporting and suggested remediation.

### User Acceptance Testing

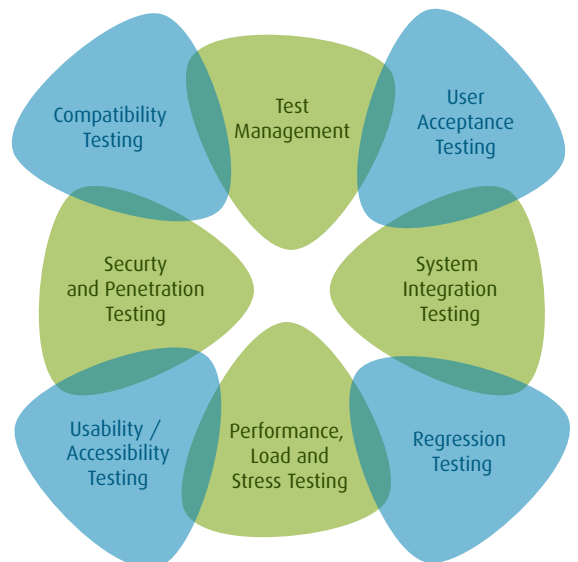

Testing to ensure a system meets users’ /clients’ needs in real world conditions.

### System Integration Testing

Testing of the components (and dependencies) of a software solution to ensure correct functionality between separate modules.

### Regression Testing

Testing to ensure that defects have not been introduced during the development process.

# Software testing practices

## Performance, Load and Stress Testing

Testing to determine the maximum sustainable load a system can handle and the loads at which a systems fails. We use automated tools to generate various loads and collect performance results about your system so we can identify problems.

## Usability and Accessibility Testing

Testing to identify the design strengths and weaknesses of your product, providing an objective way to understand how your product meets the needs of its users.

## Security and Penetration Testing

Testing to identify if there are any security weaknesses in the way your system (and its various components) have been implemented and configured.

## Compatibility Testing

Testing of an application's compatibility with various computing environments, including operating systems, browsers, display resolutions and internet connection speeds.

With end-to-end capability, Enex TestLab can deliver your entire testing service or simply augment your existing team, boosting its capacity and expertise for specific projects. This includes support for:

- > Test strategy and plan development
- > Test scenarios, cases, data sets and script development
- > Execution
- > Reporting and results analysis
- > Defect retesting
- > Regression testing

## Key Benefits:

Experience, Independence, Global testing, Quality, Relationships & extensive testing capabilities.

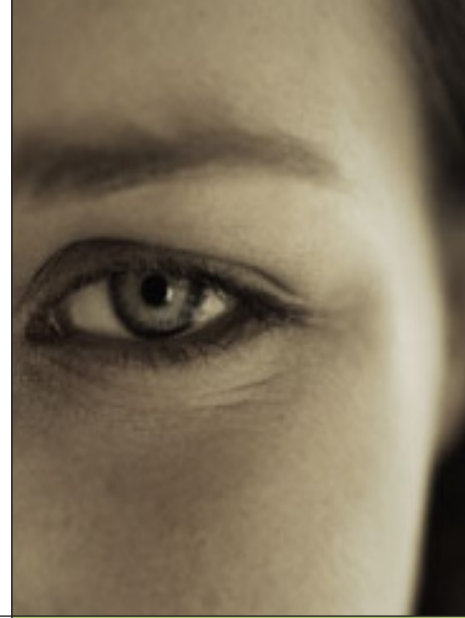

## Methodologies

Enex TestLab understands software testing. We have experience with all conventional processes, procedures and testing methodologies including:

- > Waterfall
- > V-Model
- > Agile

We support a risk-based approach, prioritising our testing to maximise its value.
