

About Enex TestLab

“The world’s premier independent testing laboratory.”

Since 1989 Enex TestLab has helped the world’s biggest companies minimise risk, improve products and save money. Enex TestLab provides high quality independent testing services and advice.

Our range of testing include:

- Software <
- Hardware <
- Systems <
- Security <
- Usability & Accessibility <
- Gaming, Wagering, <
- Lotteries & Casinos
- Media & Communications <
- Physical & Materials <

Test assured, rest assured.

CCT Mark Testing

CCT Mark Testing

The CCT Mark Scheme (CESG Claims Tested Mark) is a UK Government scheme for buyers of IT security and Information Assurance (IA) products and services. The scheme has been established to prove the validity of security functionality claims made by vendors. It ensures products and services actually do what they claim to do.

The scheme uses accredited independent testing from Enex TestLab.

The CCT Mark scheme is administered by the Communications-Electronics Security Group (CESG), which is the National Authority for Information Assurance and is part of Government Communications Head Quarters (GCHQ) at Cheltenham.

The CCT Mark scheme is a fast and cost effective way of testing and validating the claims made about the security functionality of IA products and services. Approval under the CCT Mark means that your products can be used across the wider public service to manage risks at Impact Level 2 and below.

Increasingly, the public sector is requiring CCT Mark certification as part of its procurement activities, particularly for Critical National Infrastructure (CNI) enterprises.

How does it work?

The scheme has been designed to be quick and cost effective, taking about 10-12 weeks to certification!

There are 4 steps in the certification process. Enex TestLab can assist with each.

- > 1.
An Information Assurance Claims Document (ICD) is developed for your product or service. This formally states the claims that will be made about your product and how they will be tested.
- > 2.
The ICD is registered with CESG, which reviews it together with the proposed Enex test programme and accepts it for claims testing.
- > 3.
Enex completes the agreed testing and issues a report.
- > 4.
CESG reviews the report and, if satisfied, awards the CCT Mark for a period of two years. Details are published on the CCT Mark website www.cctmark.gov.uk

CCT Mark Testing

What are the Benefits?

> Customer assurance

Your public sector customers can have complete confidence in the claims you make about your products. They are independently tested and certified. This shortens the selling cycle for you and reduces the risk for them. It also automatically qualifies your product or service for entry on the Ministry of Defense (MOD) Defense INFOSEC Product Co-Operation Group (DIPCOG) register of IA security products and services.

> Cost effective and speedy

The process takes less than 3 months to complete and the cost is capped by CESG.

> Independence

Enex TestLab is an independent accredited testing facility (ATF) approved by CESG to carry out these tests. This gives assurance to you and your customers. Certification brings independent validation of your product.

> Ease of use

The claims testing process also considers the product's ease of use and the accuracy of its supporting documentation. It provides additional assurance to your customers at every level.

> Includes Services

This is the only scheme that covers IA services. In addition to any specific testing that may be required, existing customers are interviewed to check the procedures against claims being made in the ICD.

The benefits of testing with Enex TestLab are:

> Independence

Enex TestLab provides objectivity and independence ensuring a realistic appraisal of your product—a fact recognised by CESG in its approval of Enex TestLab as an accredited CCT Mark testing laboratory.

> Expertise

Enex TestLab employs experienced security and testing engineers. This ensures it can quickly develop and complete testing programmes whatever the complexity.

> Resources

Enex's test environments cross the vast range of hardware and software that comprise your marketplace.

> Quality

Enex TestLab is ISO 9001 certified and an ISO 17025 accredited laboratory.
