- Software <
- Hardware <
- Systems <
- Security <

Usability & Accessibility <

Gaming, Wagering, <
Lotteries & Casinos

Media & Communications <

Physical & Materials <

Test assured, rest assured.

Security Capability Brief

Enex TestLab is an acclaimed provider of security testing services across the globe.

Highly accredited, Enex TestLab can test the quality of your security system. Enex TestLab commonly identifies poorly procured, incorrectly deployed, or inappropriately configured security products. We can help you to efficiently manage your security system against your own risk priorities, information value and cost thresholds.

Enex TestLab provides customised, scientific and impartial testing services that:

- > **Lowers your risk**
- > **Maximises the return on your investment**

Our goal is to save you time and money. We have tested security systems for the world’s biggest companies, saving millions of dollars in the process and significantly reducing their risk and exposure.

Enex TestLab provides a complete security testing solution complementing your development lifecycle from business case to security acceptance testing that helps you meet your planned release dates by avoiding last minute security problems.

Services

Penetration Testing

Enex TestLab Penetration Testing uses the real-world tools and techniques of sophisticated hackers to test your security system in a controlled and ethical way.

IIA Family Friendly Filter Program

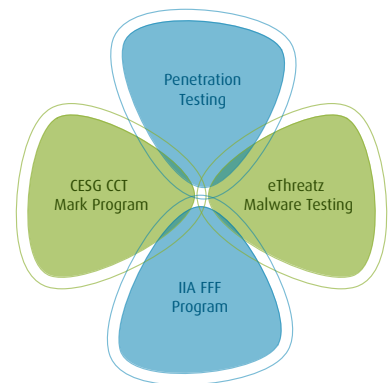

Accreditation under the Internet Industry Family Friendly Content Filter Program is available from Enex TestLab.

eThreatz Automated Malware Testing

eThreatz is the world’s first, fully-automated and customisable malware testing services. eThreatz uses live malware to automatically test your security system for the complete range of threats.

Independent Security Assessment

Enex TestLab can provide an independent assessment of your organisation’s security posture from a number of perspectives: governance structure, risk profile, compliance with regulations and standards and even configuration of technical security measures.

Security testing practices

CESG CCT Mark Program

A UK Government scheme for buyers of IT security and Information Assurance products and services. Enex TestLab can test and validate claims made about the security functionality of products and services.

Other relevant services include:

- > Risk assessment to support your project's business case.
- > Facilitation of the selection of security requirements for your project.
- > Manual source code analysis and/or facilitated with automated software
- > Functional security testing of security controls to check that security requirements are met.
- > Vulnerability assessment to identify and rectify poor security configuration of web servers, application server, databases, operating systems and network devices.
- > Penetration testing to ensure security controls are not able to be bypassed.
- > Physical security assessment and testing.

Key Benefits:

Experience

Enex TestLab has highly experienced security specialists, including former defence personnel and security officers from the finance sector.

Methodologies

We work precisely to test in line with your risk assessment and risk profiles. Our state-of-the-art test environments can replicate any hardware and software combination to ensure customised and controlled outcomes, or we can also test in live environments to provide a real-world assessment.

Quality

We maintain both ISO9001 quality certification and ISO17025 test laboratory accreditation. Enex TestLab consultants hold high-level security-specific certifications, including CISSP, CISM, CISA and CSEPS. They are also members of international information systems organisations, such as ISACA, ISSA, ISC2 and AISA.

Return on Investment

Enex TestLab delivers proven returns on your investment by helping manage your risk priorities and system maintenance, and by actually testing your system using controlled, ethical hacking methodologies.

Test Assured, Rest Assured with Enex TestLab.
